

DIPARTIMENTO DI INGEGNERIA CIVILE, EDILE E AMBIENTALE - I C E A
DEPARTMENT OF CIVIL, ENVIRONMENTAL AND ARCHITECTURAL ENGINEERING

PHD COURSE in CIVIL, ENVIRONMENTAL AND ARCHITECTURAL ENGINEERING A.Y. 2023-2024 (XXXIX cycle)

Title:

“Advanced design of transport infrastructures”

Lecturers:

Dr. Giovanni Giacomello (giovanni.giacomello@unipd.it) and Dr. Andrea Baliello (andrea.baliello@unipd.it)

Program:

Basics of transport infrastructures design. Standards and design software. Fundamentals of Infrastructure Building Information Modeling (I-BIM). Elements of vehicles mechanics, analysis of vehicle-infrastructure interaction and safety of transport infrastructures. Study of infrastructures behavior, definition of components and evaluation of materials properties. Construction, management, and maintenance of infrastructures. Finite element modeling of transport infrastructures and analysis of the stress-strain state in the infrastructure components (with numerical application and examples). Elements of maintenance techniques and analysis of life cycle assessment for transport infrastructures. Introduction to advanced tests to characterize the infrastructure materials.

Examination and grading:

Oral examination at the end of the course, checking on completeness and suitability of knowledge.

Course details:

Course offered in-person. Room: “ICAR/04” (ground floor). Class method: frontal lecturing, using blackboard and/or video projector.
